

Using the Enviro+ Sensor

Marc and Anna

July 14, 2020

1 Introduction

2 Connecting to Pi

2.1 Hardware Connection Options

2.2 Raspberry Pi Connections

2.2.1 Update Firmware

2.2.2 Download software

```
curl -sSL https://get.pimoroni.com/enviroplus | bash
```

Until I can figure out what files we need then move them onto a Pomona server, we are going to have to trust these guys with our virtual life. Ugh!

Downloading (cloning the site, take about 10-15 minutes).

but didn't work... so try the next section git instead...

```
git clone https://github.com/pimoroni/enviroplus-python
cd enviroplus-python
sudo ./install.sh
```
